

## Industry Interaction –Special Lecture Series

### On “Management of Emerging Technologies: Opportunities and Challenges”

by

Dr. Niranjan Kumar **Founder & CEO, ABS Novacell Biopharma, USA**

One of the unique features of the FABS PGDM (Agri- Business) programme includes practical engagement with industry. As a part of our programme FABS will expose students to real life managerial issues. **The Industry Interaction – Special Lecture** series objective is to enable the students gain an understanding of how an organization is structured and managed and sensitize students to the culture of an organization. It provides an opportunity to the students to network with professionals in the field which will be useful to further their career prospects. Dr. Niranjan Kumar would highlight in **Special Lecture Series** on Innovation, Business Development, Finance and management strategies, R &D, Project & Product management, Commercial Manufacturing, Product & Process Development, Analytical Development & Validation, Technology Transfer, Quality Control, Quality Assurance, Regulatory, CRO, CMO, Formulation & ICH Stability, Technology Management &, External R & D, Business Development, DD & Technology Valuation, and Entrepreneurship.
